Assessing Your QA Maturity

In the age of connected experiences, businesses are developing & deploying applications, products and services at speed. It is critical for QA leaders to ensure consistent quality experience is delivered at optimal cost and speed. As a result, QA leaders are focused on adopting continuous testing, increasing the coverage of test automation, improving the productivity of resources by building the right skills, selecting the right tools and frameworks, and accelerating the adoption of Agile and DevOps.

Assess Your QA Ecosystem Using Movate's Assure Framework

QA leaders or Development Leaders need to assess the maturity of their existing QA ecosystem to identify improvement areas and build a roadmap for continuous and automated quality engineering. Movate, based on its 18+ years of experience in delivering agile-led and automation-first quality engineering services, has developed the Movate Assure Framework to quickly assess QA maturity and recommend solutions.

Assessment Areas

People
Process
Automation
TDM
Test Environment
Agile, DevOps
Tools & Frameworks
Knowledge Management
Metrics & Reporting

Movate Assure Framework

Understand & benchmark current testing practices	Assess test data and test environment management	Understand automation coverage	Define key metrics & measurable outcomes	Identify teams' skill gaps as per business need	Review methodologies, techniques, tools

Benefits

- An independent assessment highlights issues and bottlenecks in current QA processes
- Roadmap for predictable & frequent release cycles
- Recommendations to mature quality culture across the organization
- Increased productivity and reduced time to market through industry's best testing practices and tools recommendations

Our 5 Day QA Assessment at Zero Cost

Collaborative approach to define the roadmap

Our QA consultants will collaborate with your key stakeholders to identify strengths, areas of improvement and provide a clear road map to achieve the goals in the assessment report.

ACTIVITIES

- Identify areas and stakeholders for assessment - QA, Product and Engineering Leaders
- Use Movate Assessment Framework to analyze effectiveness of existing test status on people, process, technology and resources
- Document end-to-end QA processes from requirements to go-live
- Present key findings and recommendation to key stakeholders
- Prioritize identified challenges and summarize the findings and recommendations
- Develop assessment report & interim plan

KEY STAKEHOLDERS

INCLUDE THE FOLLOWING ROLES -

- QA Director / Manager
- Software Development Director / Manager
- Key Business Stakeholders

CONSIDER INCLUDING, AS NEEDED -

- Other key members of the QA organization
- Product Managers
- PMO Leaders / Program Managers

ILLUSTRATIVE DELIVERABLES & OUTCOMES
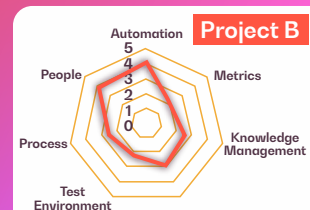

ASSESSMENT REPORT

- Benchmark project or organization against best practices
- Identify strengths & investment areas
- Cross-pollination & collaboration potential
- Areas of conflict
- Develop a high-level roadmap around transformation areas
- Define KPIs and success criteria to measure outcomes

IMPROVEMENT SUGGESTIONS ON...

- Right resources, testing tools, testing processes and approaches, changes to quality gates and checklists

Project A

Project A is not able to scale up on **Automation** due to issues with Test Environment and Test Data. The current tooling may also need to be revisited to better align with the outcomes required.

Project B

Project B does well on **Automation**, has high skilled resources, but does not invest in metrics, knowledge management and is reliant on SME's, tribal knowledge which poses a risk in the future.
